Okey doke.

Thanks Brian! I appreciate it.

I don't think a map is necessary for this one. But agree that normally more info is better.

Thoughts?

I thought you mentioned that including a map or visual was advised..... it's my first day acting for UIC again but dang it... I'll push this if I have to... I want the nation to be ok with how we are approaching them.

Hey Renee,

Based on their map, the Upper Allegheny Watershed covers most of McKean County. The Sandstone injection well is near Bradford which is certainly in the watershed. Honestly, because this is an enhanced recovery project, I think they'll probably decline our offer for consultation just like they did for Bull Run.

Hey Kevin,

The letter looks great.

Did anyone mention including a map showing them the exact location of this well compared to their area of concern or was this something you were going to provide if they request consultation? Sorry for coming into this conversation late...

Thanks!

Subject: Seneca Nation Consultation Letter - Sandstone Development

All,

I put together a consultation letter for the Seneca Nation regarding Sandstone Development's Class II-R well. I pulled in some elements that Brian provided from another consultation letter. I didn't give the Nation a firm date on when we'd like to hear back about their decision to consult with us or not because I wasn't sure when

this would make it to Diana's desk for signature. Please make changes as you see fit. I made it a OneDrive document for version control.

Thank you!
